SUMMARY

Business Analyst and Project Coordinator with experience in requirement gathering, client consulting, project management, and business process analysis. Handled **7+ software projects** across multi-vendor e-commerce, inventory, gym and school management, Farm ERP, HRMS, and multi-service applications. Skilled in BRD/FRD documentation, workflow analysis, stakeholder management, and pre-sales. Coordinate UI/UX, development, and testing teams from requirements through delivery. Proficient in SQL, Excel, Power BI, and Agile methodologies.

EXPERIENCE

Business Analyst & Project Coordinator

Waplia Digital Solutions 04/2026 - Present

- Gather client requirements, analyse business needs and workflows, and define project scope and suitable software solutions.
- Prepare proposals, BRDs/FRDs, wireframes, user flows, and functional requirements; support pre-sales and project planning.
- Translate requirements into tasks for UI/UX, development, and QA teams; clarify workflows and expected outcomes.
- Manage client communication, timelines, dependencies, change requests, testing, and delivery; track digital marketing deliverables.
- Coordinate **Vooket** (grocery, food delivery, ride booking); worked on **2 multi-vendor platforms: CTKart and CWFashion**.

Client Coordinator

IQ Setters 08/2025 - 03/2026

- Acted as the liaison between clients and development teams to support CRM operations, enhancements, and software delivery.
- Handled CRM queries, coordinated troubleshooting, and conducted client training to improve system adoption.
- Coordinated website updates, content management, CRM enhancements, and ongoing client requirements.
- Collaborated with developers on HRMS feature development based on client and operational requirements.
- Conducted competitor and feature research on **3 HRMS platforms**: Zoho People, Keka HR, and greytHR.
- Tracked deliverables, feature updates, requirements, and project progress while maintaining clear client communication.
- Supported HRMS functional testing by validating workflows, documenting bugs, and tracking stakeholder feedback.

Business Process Analyst Intern

Logixgrid Technologies 03/2026 - 03/2026

- Supported KWE (Kintetsu World Express) WMS reliability by tracking reported issues and coordinating task assignments.
- Collaborated with cross-functional teams to streamline operations, contributing to a **10% cost reduction** while maintaining quality standards.
- Facilitated communication between teams to support the resolution of operational and software issues.

Business Analyst Intern

Insignia Consultancy Solutions 05/2024 - 11/2024

- Gathered and analysed business requirements across departments; prepared BRDs, FRDs, and SRS documents.
- Participated in Agile ceremonies, including daily stand-ups, sprint planning, and retrospectives.
- Created SQL-based reports to analyse KPIs and business performance.
- Assisted in pre-sales documentation, feature mapping, proposals, and solution planning.
- Coordinated with internal teams to ensure requirements were clearly understood and implemented.

EDUCATION

MBA in Marketing & Business Analytics

Graphic Era Hill University

09/2023 - 07/2025 Dehradun

Project Coordination | BRD/FRD/SRS | SQL | Excel | Agile & Scrum | SDLC | API | Pivot Table | Microsoft Power BI | User Stories | Requirement Gathering | Pre-Sales | Documentation | DAX | Stakeholder Mgmt | Wireframing

PROJECTS

HRMS Development Project

HRMS feature research, development coordination, and functional testing.

- Researched HRMS platforms and compared features to identify improvement opportunities.
- Collaborated on **4 modules**: Leave Management, Asset Tracking, Delegation, and Payroll.
- Validated workflows through functional testing; documented bugs and usability issues.
- Maintained trackers for change requests, feature updates, testing progress, and stakeholder feedback.
- Provided recommendations for feature optimisation before deployment.

SQL E-Commerce Database Analysis Project

E-commerce database analysis of sales and customer purchasing behaviour.

- Built a structured database with Customers, Products, and Orders tables.
- Used JOINs, GROUP BY, aggregate functions, subqueries, and CTEs for business analysis.
- Analysed revenue, customer purchase patterns, product performance, and monthly order trends.
- Identified top-performing products to support business decisions.

Sales Insights Dashboard | Power BI

Interactive sales reporting and business metric visualisation in Power BI.

- Built an interactive dashboard for sales, revenue, order trends, and category performance.
- Created DAX measures for **3 KPIs**: total revenue, order count, and average order value.
- Used filters and slicers for dynamic analysis and performance comparison.
- Applied data modelling and clear visualisations to support business metric analysis.
